

February 21, 2012

The Board of Trustees
City of Grosse Pointe Woods Employees Retirement System
Grosse Pointe Woods, Michigan

Dear Board Members:

The purpose of the annual actuarial valuation of the City of Grosse Pointe Woods Employees Retirement System as of June 30, 2011 is to:

- Compute the liabilities associated with benefits likely to be paid on behalf of current retired and active members of the Retirement System,
- Compare accrued assets with accrued liabilities to assess the funded condition of the Retirement System, and
- Compute the City's recommended contribution rate for the Fiscal Year beginning July 1, 2012.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices. Data concerning active members, retirees, beneficiaries and assets was provided by the City. This data has been reviewed for reasonableness, but no attempt has been made to audit such information. The valuation was based on the provisions of the Retirement System as amended through June 30, 2011. The actuarial assumptions used in this valuation represent reasonable expectations of future experience under the System. This report was prepared under the direction of a member of the American Academy of Actuaries who meets the qualification standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Respectfully submitted,

Denise M. Jones

Senior Consultant

Sandra W. Rodwan

Member, American Academy of Actuaries

Section One:
Valuation Summary

Purpose of Valuation

The purpose of the annual actuarial valuation of the City of Grosse Pointe Woods Employees Retirement System as of June 30, 2011 is to:

- ❖ Compute the liabilities associated with benefits likely to be paid on behalf of current retired and active members of the Retirement System,
- ❖ Compare accrued assets with accrued liabilities to assess the funded condition of the Retirement System, and
- ❖ Compute the City's recommended contribution rate for the Fiscal Year beginning July 1, 2012.

This valuation is exclusive of post-retirement health benefits.

Liabilities and Funded Condition of Retirement System

Total accrued pension liabilities of the Retirement System as of June 30, 2011, were computed to be \$42,738,073. The funding value of accrued assets allocated to pensions was \$37,666,835. The ratio of the funding value of accrued assets allocated to pensions to accrued pensions liabilities was 88.1%.

Funding Value of Assets

A funding value of assets was used for the June 30, 2011 valuation. The funding value spreads the difference between the actual and assumed investment return over 5 years.

Computed City Contribution Rate

The City's normal cost contribution rate for pensions was computed to be 6.88% for General members and 8.58% for Public Safety members. Amortizing the excess of accrued assets allocated for pension benefits over accrued liabilities over 25 years resulted in an amortization payment of 5.67% of member payroll.

Retirement System Experience

The net overall experience of the Retirement System during the year ended June 30, 2011 was offsetting based on the long-term assumptions. The rate of return on the market value of assets was significantly greater than assumed. But the recognized return on the funding value was less than assumed due to the carry-forwards of experience from prior years. Salary increases which were less than assumed were the primary source of favorable experience.

Benefit Provision Changes

There were no benefit changes included in this valuation.

Assumption and Method Changes

There were no assumption changes. The smoothing period used to compute the funding value of assets was increased to 5 years from 4 years as of June 30, 2010. This change was adopted by the Retirement Board on February 3, 2011.

Participant Data

Section Two:

***Actuarial Calculations –
Funding***

Computed Contribution Rates for The Year Beginning July 1, 2012

The contribution rates shown below are expressed as percents of active member payroll.

The normal cost can be viewed as the long-term on-going cost of the Retirement System.

The unfunded actuarial accrued liability was amortized as a level percent of payroll over 25 years. The 25 year period is the same as the period used last year to amortize the excess of accrued assets over accrued liabilities.

<u>FOR PENSIONS</u>	<u>Percents of Payroll</u>	
	<u>General</u>	<u>Public Safety</u>
Normal Cost		
Regular Retirement	8.58%	9.19%
Pre-retirement Death	0.57	0.69
Disability	1.19	3.37
Withdrawal	<u>1.69</u>	<u>1.33</u>
Total Normal Cost	12.03	14.58
Member Portion	5.15	6.00
City’s Computed Normal Cost	6.88	8.58
Total Unfunded Accrued Liability	5.67	5.67
City’s Contribution Rate for Pensions	12.55%	14.25%
City’s Dollar Contribution*	\$368,594	374,786

*Based on valuation payroll of \$2,769,200 and \$2,479,811 for General and Public Safety respectively, projected to mid-way through the contribution fiscal year.

Unfunded Actuarial Accrued Liability

	<u>6/30/2011</u>	<u>6/30/2010</u>
Actuarial Accrued Liability	\$42,738,073	\$41,541,369
Assets Allocated to Funding	<u>37,666,835</u>	<u>36,073,560</u>
Unfunded Actuarial Accrued Liability	\$5,071,238	\$5,467,809

**Computed City Contributions –

2012	2011	743,380		12.55	14.25

(a) After changes in benefit provisions and/or actuarial assumptions.

* Reflects amortization of the credit for accrued assets in excess of accrued liabilities for all valuations except 2005, 2006 and 2007 and 2009.

Prior to the fiscal year beginning July 1, 2006, contribution amounts included health insurance.

Based on valuation payroll.

Note: Results prior to 2008 are based on reports provided by previous actuarial firm.

History of Assets and Accrued Liabilities

Valuation Date June 30	Valuation Assets	Actuarial Accrued Liabilities	Funded Ratio	Unfunded Actuarial Accrued Liabilities

2011	37,667	42,738	88.1	5,071

(a) After changes in actuarial assumptions.

Results shown throughout this report for years prior to 2008 were prepared by the previous actuarial firm.

Comments and Conclusion

Comments: Overall experience of the Retirement System was largely offsetting during the year ended June 30, 2011. The return on the market value of assets was significantly more favorable than assumed. But the recognized rate of return on the funding value of assets was 5.86% versus 8% assumed. The funding value spreads the difference between the actual return for the year and the assumed return over 5 years. The 5 year period was adopted by the Retirement Board effective beginning with the 2011/2012 FY contribution. The increase in the funded ratio to 88.1% from 86.8% reflects the effect of salary increases which were less than assumed and the change to 5 year smoothing for the funding value of assets.

Conclusion: The accrued funding condition of the Retirement System is good. Maintenance of this condition is dependent upon continued receipt of future contributions as recommended. Contribution rates are likely to increase in the future as carry forwards of negative experience from prior years are recognized in the funding value of assets.

Section Three:

***Retirement System
Benefit Provisions***

Benefit Provision Summary

Regular Retirement ***(No reduction factor for age)***

Eligibility:

General, Dispatchers/Paramedics and Public Safety members:

Age 50 with 25 years of service, age 55 with 20 years of service, or age 60 with 10 or more years of service.

Annual Benefit:

General members:

Final Average Compensation (FAC) times the sum of 2.0% times the first 25 years of service plus 1.0% times years of service in excess of 25 years.

Dispatchers/Paramedics:

2.125% of Final Average Compensation (FAC) times service.

Public Safety Officers and Command:

2.5% of Final Average Compensation (FAC) times service to a maximum of 75% of FAC.

Type of Final Average Compensation:

General members: Highest 4 years of compensation.

Dispatchers/Paramedics: Highest 3 years of compensation.

Public Safety: Highest 3 calendar years of compensation out of the last eight calendar years prior to retirement.

Deferred Retirement ***(Vested benefit)***

Eligibility:

General members: 10 years of service.

Dispatchers/Paramedics and Public Safety members: 25 or more years of credited service or age 50 with 15 or more years of service.

Annual Benefit:

Computed as regular retirement but based on service and final average compensation at time of termination. Benefits begin at age 60.

Duty Disability Retirement

Eligibility:

No age or service requirements.

Annual Benefit:

Computed as regular retirement with additional service credit granted to the earlier of the date the member would attain age 55 years or the date the member would have satisfied regular retirement eligibility conditions had the member continued in City employment.

General and Dispatchers/Paramedic members have worker's compensation offsets.

Public Safety members, depending upon whether or not they are eligible for a service retirement at the time of injury, may elect to choose between worker's compensation benefits or a disability pension.

Non-Duty Disability

Eligibility:

10 or more years of credited service.

Annual Benefit:

Computed as a regular retirement.

Duty Death in Service Survivor's Pension

Eligibility:

No age or service requirements. Must be in receipt of worker's compensation.

Annual Benefit:

Upon termination of worker's compensation a benefit equal to the worker's compensation amount shall be paid to the widow, unmarried children under 18 and dependent parents. Maximum benefit to the widow: 50% of final average compensation, to the children: 20% of final average compensation, and to the parents: 16-2/3% of final average compensation.

Non-Duty Death in Service Survivor's Pension

Eligibility:

10 years of service.

Annual Benefit:

Computed as a regular retirement but actuarially reduced in accordance with a 100% joint and survivor election.

Post-Retirement Cost-of-Living

Annual adjustments based upon changes in the Consumer Price Index subject to a maximum increase or decrease of 2.5% of the adjusted retirement allowance. The cost-of-living adjustment shall be paid on both the base pensions and, for retirements on or after 7/1/90, supplemental annuity distributions.

Member Contributions

General Members: 5.0% of annual compensation.

Public Safety and Dispatchers/Paramedics Members: 6.0% of annual compensation

Annuity Withdrawal

A member may withdraw accumulated member contributions in a lump sum at retirement. The retirement allowance is reduced by the actuarial equivalent of the annuity withdrawn, based on actuarial assumptions concerning interest and mortality used in the annual actuarial valuation.

Pop-Up Provision

Upon the death of the beneficiary, a retiree who had previously selected either Option II or Option III will have the retirement allowance recomputed as a straight life allowance.

Section Four:

***Actuarial Assumptions
And Methods***

Actuarial Assumptions

Economic Assumptions

- (i) **Interest Rate** 8.0% (net of expenses)
- (ii) **Salary Increases**
 - Wage Inflation 4.0%
 - Merit and Longevity Age-related rates

Sample Annual Rates of Salary Increase

66	30	30
67	40	40
68	50	50
69	90	90
70	100	100

Members were assumed to be eligible for retirement after attaining age 50 with 25 years of service or age 55 with 20 years of service, or age 60 with 10 or more years of service.

Actuarial Method Used for the Valuation

Normal Cost. Normal cost and the allocation of actuarial present values between service rendered before and after the valuation date were determined using an individual entry-age actuarial cost method having the following characteristics:

- ❖ The annual normal costs for each individual active member, payable from date of hire to date of retirement, are sufficient to accumulate the value of the member's benefit at the time of retirement;
- ❖ Each annual normal cost is a constant percentage of the member's year-by-year projected covered pay.

Financing of Unfunded Actuarial Accrued Liability. Unfunded actuarial accrued liabilities were amortized as a level percent of payroll over the same 25 year period used in the prior year's valuation to amortize the excess of accrued assets over accrued liabilities.

Active member payroll was assumed to increase 4.0% a year.

Section Five:
Valuation Data

Asset Summary

As of June 30, 2011, the market value of assets was reported to be \$36,229,522. The funding value of assets as of June 30, 2011 was \$37,666,835.

Derivation of Funding Value of Assets

Section Six:
Supplemental Annuities

Computed Contributions for Supplemental Annuities Beginning July 1, 2012

<u>CONTRIBUTIONS FOR</u>	<u>City Contributions Expressed As Dollars Per Active Member</u>	
	<u>General</u>	<u>Public Safety</u>
Normal Cost	\$623	\$0
Unfunded Actuarial Accrued Liability	<u>4,213</u>	<u>807</u>
Total Per Member	\$4,836	\$807

Actuarial accrued liability, \$3,040,165 was reduced by accrued assets, \$1,154,882, and the resulting unfunded actuarial accrued liability, \$1,885,283, was amortized as level dollar payments over a period of 12 years, a decrease of 1 year from the period used for the June 30, 2010 valuation.

Contributions for Public Safety are shown per active member for historical reasons; there are no active Public Safety members currently eligible. The dollar amount of the Public Safety contribution is \$25,817.

Supplemental Annuities

Eligibility:

Age 50 with 25 years of service, age 55 with 20 years of service, or age 60 with 20 years of service. General members who qualify for a disability retirement are also eligible. Public Safety members with retirements effective after December 31, 1994 are not eligible.

Amount:

Years of Service	Per Month
10-14	\$250.00
15-19	300.00
20-24	350.00
25 & Over	400.00

Post-Retirement Adjustments

Eligibility:

Retirements effective on or after July 1, 1990.

Benefit:

The amounts in the above table are increased 2.5% compounded each year following retirement.

Post-Retirement Survivor Benefits:

50% of the benefit is payable to the spouse of a deceased member.

Asset Summary for Supplemental Annuities
