CITY OF GROSSE POINTE WOODS
BUILDING DEPARTMENT
MEMORANDUM

TO: Planning Commission

FROM: Gene Tutag, Building Official
Sean Ditty, Property Maintenance Inspector

DATE: May 18, 2015

SUBJECT: Proposed Benches, Trash Canisters, and Planters for Mack Avenue Streetscape

Planning Commission Chair, John Vitale, requested a Planning Commission Workshop be held on May 26, 2015 to discuss future options for an approved design for benches, trash canisters and planters that can be placed on the Mack Avenue streetscape.

The attached options submitted to the Planning Commission have been researched and recommended by Building Official Tutag and Property Maintenance Inspector Ditty.

PLANNING COMMISSION EXCERPT
10/28/14

Sean Ditty presented various potential streetscape objects for the Commission to review in attempting to implement the design aspects of the 2020 plan.

Villa Style | Outdoor Benches with Horizontal Steel Slats

Model VS6CSS (Planter Model PFTP Sold Separately)

Modular Outdoor Benches

Gorgeous modular outdoor benches crafted of durable commercial grade steel. Featuring decorative villa style cast iron frames. Pre-drilled surface mounting holes. Anchoring hardware is not included.

The state of the art finishing process used on these products combines the application of an 'Electrocoat Zinc Rich Primer' with a durable powder-coat to ensure every crevice and joint is completely coated, providing full protection against corrosion and weathering. Choose between a smooth **Solid Color Powder-Coat** or a textured **Hammertone Powder-Coat** in the color options shown below to achieve a finished look that will last for years.

34 Gallon Outdoor Trash Can | Premier EV Series

Steel Trash Can with Various Lid Options and Color Choices

This EV Series outdoor trash can is constructed of 3/16" x 1" flat bar pickets held in place by two 3/16" x 2" wide flat circular bands which serve as extra reinforcement for this commercial grade trash can. The flare top is finished off with a smooth 1" O.D. ring. Two horizontal flat steel bars at the bottom keep the liner off the ground. Black 34 gallon polyethylene liner and stainless steel anti-theft lid lanyard included.

Trash can, flat lid, weather shield lid, and ash urn weather shield lid are all offered in polyester powder-coated (**solid & hammertone**) finish, color options as shown. Plastic dome top lids are available in the colors shown.

This trash can is powder-coated using a state of the art finishing process combined with an 'Electrocoat Zinc Rich Primer' to ensure every crevice and joint is completely protected against corrosion and weathering. Choose between a smooth Solid or textured Hammertone finish in the color options shown below.

Model PFT34-EV

Please Note

These steel trash cans are available with several versatile options designed to suit your needs. To make your ordering process simple please follow the *easy 3 step ordering process*.

Step 1 - Select Base:

Select Model (A) and Choose trash can color.

Step 2 - Select Lid:

Select Model (B, C, D, E, F or G) and Choose lid color.

Step 3 - (H) Enter the Quantity of the complete trash can(s) you would like to order.

Trash can(s) base and lid will appear as separate line-items on the order form.

Assembly Instructions

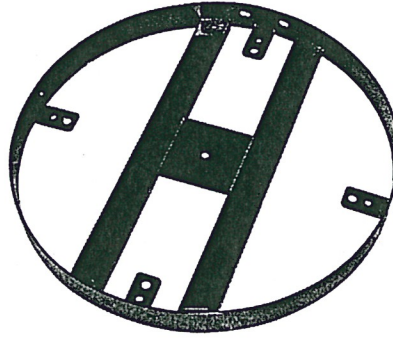

32Gal.Steel Slat Receptacle w/ Flat Lid

Before assembly, be sure that all components are included.

A – 2 receptacle halves

B – 1 receptacle base

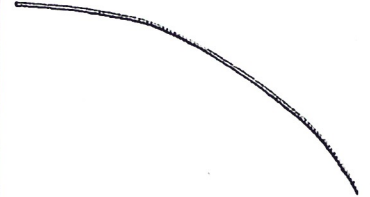

C – 1 liner

D – 1 flat lid

E – 2 cable clips

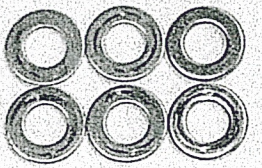

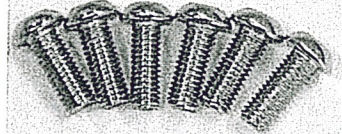

F – 1 cable

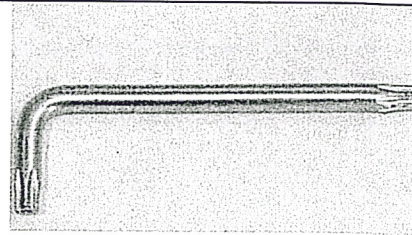

G – 2 Phillips head screws

H – screws

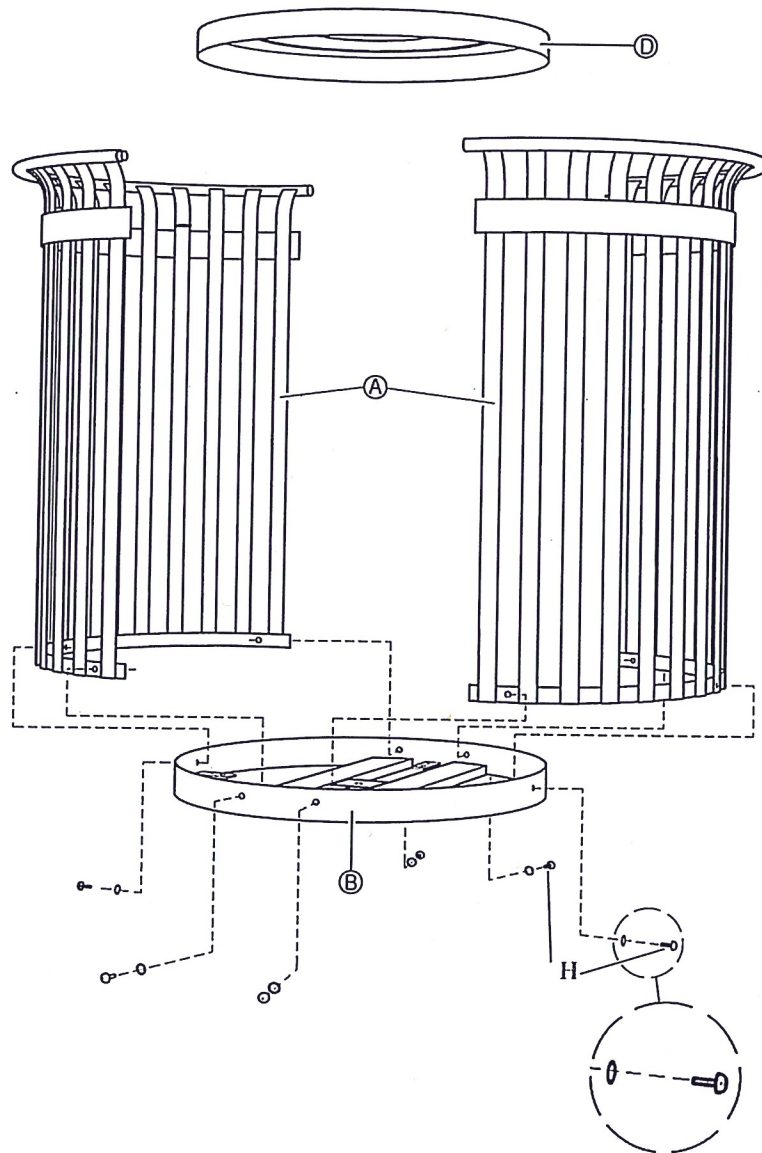

J – screws

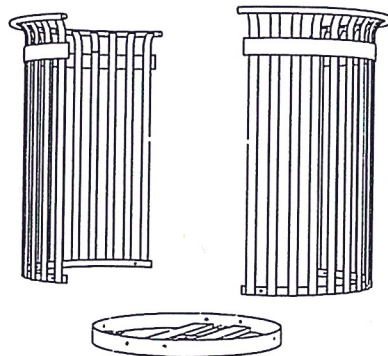

K – 1 Allen wrench

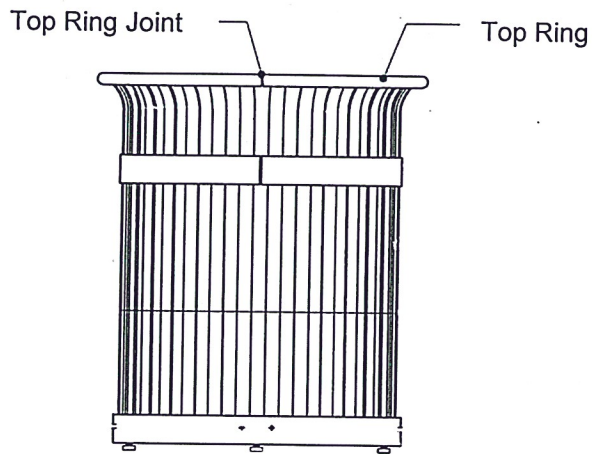

Tools needed: 1 – Allen wrench (provided), 1 - Tamperproof screw driver, 1 - Phillips screw driver,
1 - Heavy duty pliers

Step 1: Place the receptacle base (B) on firm flat surface with the flange side up. Position each of the receptacle basket halves (A) around the inside of the receptacle base flanges to form a complete basket. Line up the pre-drilled holes.

- Step 2: Insert a bolt (H) with a flat washer loosely into holes around the bottom to secure the basket to the base. Repeat step 2 to insert other bolts. Bolts will thread tightly into the pre-drilled holes, eliminating the need for nuts. The bolts are to be only finger tight at this point. Do not tighten the bolts completely in this step
- Step 3: Squeeze the top ring together to line up the mounting holes and secure loosely with the two self tapping Phillips head screws (G) below the ring. Adjust the position of basket halves (A) if needed. Tighten all of the screws around the base and the top

- Step 4: Attach the security cable (F) to the cable lock bar on the inside of the receptacle using the clips (E) to secure the lid (D)
- Step 5: Insert the rigid plastic liner (C) into the receptacle. Set the lid (D) directly on the line (C)
